

Radical Islam

By Connie Fraley

Radical Islam is an opportunistic infection, like AIDS: It's not the HIV that kills you, it's the pneumonia you get when your body's too weak to fight it off. Radical Islam is committed to jihad against the United States and Israel, or a war of civilizations between the Judeo-Christian West and the impoverished Muslim world. Why don't we understand that Radical Islam is the greatest threat America has ever faced since World War II. If freedom wins in Iraq, radical Islam is finished.

Islam

Islam has no pope, no pictures of the Prophet, and no simulated portraits of Allah, who is genderless. Islam was spread by ruthless violence and the murder of innocents. Islam has been many things, but a religion of peace is not one of them. We should be alarmed at the scope of the problem, but prudent in responding to it, since escalating cultural conflict throughout the Continent will bring us closer to a showdown between Islamists and secularists that will increasingly look like a clash of civilizations.

Muslims

Muslims can no more give up the Koran and remain Muslims, than lions can give up their teeth, their claws, and their tawny coats, and still be lions. "Reform-minded Muslims say it's time to admit that Islam's scripture and history are being exploited," he added. Shariah, for example, allows apostates to be killed, permits beating women to discipline them, seeks to subjugate non-Muslims to Islam as dhimmis and justifies declaring war to do so. These radical Muslims changed the teachings of Islam using the man made books of Hadiths and sunna (sayings and traditions falsely attributed to prophet Muhammad) that contradict the Quran and allow them all kinds of oppression, aggression and terrorism. CAIR, a "civil rights group" for American Muslims, is itself frequently accused of pursuing a radical agenda.

Terrorism

On one level, terrorism works by simply causing us so much pain, suffering and dread of future terror that we eventually weaken and give in to the terrorists' demands. Stop and consider what happens when we're intimidated and frightened by terrorism, or even the threat of it. Virtually everyone, except the most radical appeaser, recognizes it would be disastrous to "cut and run," which would widely be perceived as a monumental victory for terrorism. The goal of Islam is to bring the whole world under Islam by any means possible, including murder, terrorism, indoctrination, or change thru societal infiltration. This clash is often expressed violently, whether it is through terrorism in New York or London, civil insurrection in Algeria, revolution in Iran or civil war in Afghanistan.

Americans

If only one percent of American citizens are expected to voluntarily and patriotically defend the nation, or national interests however defined, against a potential international Radical Islamic threat of over a billion strong, then either a significant increase in the other 99 percent of Americans not serving or committed to national defense must serve in the Armed Forces or the U. "The Americans love life, we love death, that's the big difference between us. Once the Americans leave Iraq, and Israel retreats behind its walls, the two antagonistic sects of Islam will tear each other apart. I think that the Muslim Fundamentalists, the silent Muslim majority, and the Koran have already convinced most Americans (media excepted) that Islam is the religion of JIHAD meaning "Kill Christians & Jews & all other Infidels". At least three million black Americans have abandoned the principles of Christianity for Islam in the past 25 years.

Freedom

Hate-mongers among the radical clergy use western freedoms in order to denounce them. They have not changed and we r are stupid to allow them to come to our country and enjoy our freedoms while in their own countries certain groups r have no freedoms and are persecuted. When compared to other international surveys, a "strong and significant r linkage" exists between religious freedoms and other liberties that many Westerners take for granted, such as free r enterprise, a free press and civil liberties, the report stated.
