Our teaching programmes

Basic course

The objective of the course is to offer the foundations of the Italian language and culture, in order to enhance the first approach to our country. During the lessons you will deal with topics which are useful for daily life situations. You will learn how to describe yourself and other people, how to describe your studies/job and your free time. You will begin to grasp "survival" language that will help you face various social situations (at a bar, in a restaurant, in a hotel, in shops and at the post office).

Intermediate course

This is the ideal course for someone who already has basic knowledge of Italian and is ready to further study the grammar and vocabulary aspects of Italian. Our objective is to offer a wide variety of learning activities, in order to make the lessons fun and dynamic. You will learn how to use verbs in the past tense, you will increase your vocabulary and be able to describe interests, desires, opinions and intentions in a detailed manner.

Advanced course

The objective of the course is to strengthen oral and written skills, thus giving the student more self-confidence and the opportunity to pick up the nuances of the Italian language and culture.

The focal point of the lessons will be conversation. Topics and ideas will be taken from current affairs, magazines, newspapers, Italian television etc, in order to encourage the student to speak about a variety of "made in Italy" topics.
