

Revolutionizing the Business Sector through Information Technology

"Information technology and business are becoming inextricably interwoven. I don't think anybody can talk meaningfully about one without talking about the other." -- Bill Gates

Bill Gates, is a businessman, philanthropist, and chairman of Microsoft, the software giant that he established along with Paul Allen. Gates, has ranked as the richest man in the world from 1995 to 2006. He has an estimated net worth of about \$56 billion. He is ranked second behind the Walton family, heirs of Sam Walton, the founder of Wal-Mart. Gates is one of the known entrepreneurs of the personal computer revolution. Since accumulating his wealth, Gates has pursued many charitable works, through the Bill and Melinda Gates Foundation since 2000, donating large amounts of money in many charitable organizations and scientific research programs. Since Microsoft's establishment, Gates has been responsible for Microsoft's product management since 1975 and as of 2006. Specialists credit him for broadening the company's range of products and influence of Microsoft on the global computer market.

While now technically retired from active work, he still influences the course of computer history, and even the world of business. In his book, "Business at the Speed of Thought", he reveals how improving technology is taking the business world into new heights. According to Gates, an organization is like a living organism that must rely on the nervous system that will deliver information to parts that it needs to function. In his book, Gates unveils the way how technology can improve the way the nature of business is done. He added that information technology can deliver up-to-date information anywhere in the world.

Business leaders today are looking for solutions to deliver information and other necessary details to many parts of the world. Accessible technology like the Internet can help businesses achieve goals and objectives. The Internet combined with the broadcast faxing has brought forth Internet faxing. It is a general term which refers to sending fax messages over the Internet. It is a method of using e-mails or a through a certain site like FREEiFAX. Through e-mails these fax messages are sent faster and more efficiently because traditional fax machine dilemmas are not experienced. Network delays, low signal levels, and network echo are not experienced in Internet faxing. Therefore, these fax messages reach their proper recipients faster. In addition, Internet faxing does not require additional accessories, any additional configuration or another phone line. It does not need another device aside from a computer with Internet connection and an e-mail account.

To avail of this Internet faxing service, all one has to do is visit the FREEiFAX site and sign-up. By signing up, consumers are allowed to gain access to incoming and outgoing fax messages. These messages are accessible in most parts of the world where there is Internet connection. FREEiFAX Internet faxing can be enjoyed without having to pay monthly bills. A minimum reload of \$5 is required to keep an active account and send fax messages for only 2.5 cents per send. FREEiFAX is one of most relied upon Internet faxing companies in the world. It boasts of thousands of satisfied users around in different industries and lines of business.

Bill Gates says that business and technology will remain co-existent and both fields will shape the future of the world. He says that doing "Business at the Speed of Thought" emphasizes how technology and the production of goods must be seamlessly conducted. He added that businesses must adjust to the changing times if a company wants to succeed in the Information Age.

Given the advice of a computer and business genius, exploring the benefits of Internet faxing technology may be the next best step a company should make. To know more about about Internet faxing and FREEiFAX visit freeifax.com.
