

How To Make \$10,000 In Sales Every Month With Network Marketing

Making Money Online Is Not As Easy As It Seems!

You may have read all kinds of tales about making huge amounts of money online and even being an internet millionaire - however it really isn't as easy as some people claim

Affiliate programs make it sound all so easy - you take a clickbank affiliate URL, plaster it all over the internet - what happens? You never manage as much as a single sale!

If this is your experience too, then read on

The Power Of Repeat Purchases

One of the advantages of a reputable product based network marketing business, is that you can develop a network of other people who also want to make money online. Many of these people will not buy your product through your affiliate link because they have their own affiliate link for the same product! However, because they want to make money from home, they will pay their monthly membership fee especially if the network program is helping them make real money

If you say to someone - "Here's program that really works" - you show them a list of your new downline notifications, and you show them your monthly commission cheques from the business, then once they realize it really works, they will be prepared to give it a go

If you also have a system to spill down new people to help your downline members, then they will get themselves to the point that they are receiving a commission cheque as well

The key point to grasp is that finding 1,000 new people every month to sell your \$19.99 ebook to, is going to be pretty difficult. However finding 1 or 2 people a month for your network, who pay a monthly membership fee month on month, is much more likely for just about anyone to achieve - even someone with no experience, just starting out for the first time

The same of course is true for a membership site, where you run your own program, where people can only have access to the resources/ebooks/software etc if they keep their membership up to date

How To Sell Over \$1,000 Every Month

To push your sales turnover to say \$1,000 a month, with say a monthly membership fee of just \$9.99, requires just 101 subscribers. This would actually give you \$1008.99 in monthly turnover, and because these people are going to renew every month, this turnover is guaranteed month on month

Achieving "Lift Off"

Yes, in the beginning it will be very difficult

Getting a network marketing business off the ground is hard work. Its similar to the force required to get a jumbo jet airborne. You have to race down the runway at incredible speed using a fantastic amount of engine power - but eventually as the plane nears the end of the runway, you get to that critical point where you "take off" - and nothing in the world can pull you back.

This is the same kind of phenomenon that occurs in a network marketing business.

To begin with you are paying your membership fee and advertising like crazy, but hardly generating any commissions. However eventually you recruit enough people who upgrade that your membership is then free. You are now in a position to begin working the system to generate real commissions and real turnover month on month. As the months go by and you recruit more and more people who keep their upgrades going so the network starts to take on a life of its own

This is often referred to as duplication

Duplication Makes The Work A Thousand Times Easier

Most people that join a network program will never find any new people themselves. Why this should be is hard to judge. You can give people all the tools to succeed, but for one reason or another, they just can't be bothered to put in the work to make it happen. Probably they are so worried that it "doesn't work" that they don't put in the effort to make it work. I have even known people in my own team who have given up and left the program, even though if they had upgraded, they would have received a commission cheque, due to the people I had placed under them!!

However there are some people who are not cynical and are prepared to give the thing a go. These are the people that are like gold dust. They will go on and build their own teams

The effect of this is to duplicate your effort. So if you can find 5 new people in a month and several other people in your network can also find 5 people every month, then all of a sudden your network is growing at 50 or even 100 extra people every month

This is the power of duplication

In Conclusion

In conclusion remember that the easiest way to build the biggest turnover on the internet is to harness the power of a network based program. However you must beware of programs where there is no product - these are simply unsustainable and in the main illegal. Programs where you make money as a free member just by selling the various products provided by the business are the reputable legitimate home businesses to concentrate on

By building a network of upgraded members, you are guaranteed an ever increasing turnover month on month. This turnover will be many times bigger than what you could generate selling affiliate ebooks or other products

Once you reach duplication within your team - you will be well on the way to a turnover in excess of \$10,000 every month
