

Cathay's CCIE SP Lab

The CCIE SP training can be located at Guangzhou (China) only <http://www.cathayschool.com>

1. CCIE SP LAB TRAINING

There are two tracks for lab training, one is called Intensive Track (CRSPLT-I), which takes 14 days to have it done, the other is called Fast Track (CRSPLT-F) which probably takes 18 days.

The premise for taking lab training is that:

You are Current holder of CCSP Certification or you have passed CCIE® written exam or that you have 2 years experience with Cisco® equipment

(1) Intensive Track (CRSPLT-I) 14 days (112+ hours)

The SP lab training intensive track lasts 14days and the price for it is US\$ 6800, which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

The SP lab training intensive track is designed for the students who have limited time and are almost ready for the real exam. At the first week, your instructor will help to strengthen the specific weakness of your knowledge and review the most important parts of the exam topics with you. At the second week, you will be given at least four most up-to-date mock labs which will greatly prepare you for the real exam after step-by-step analyzing by your instructor.

General study arrangement: In this track, you will receive six and half hours on learning technology, then five and half hours on applying technology each day.

Topics covered in the training:

Bridging and Switching; IGP Routing; EGP Routing; SP Multicast; MPLS; L3/L2 VPN; SP QoS and Security; High Availability; Management.

(2) Fast Track (CSPLT-F) 18 days (148+ hours)

The SP lab training fast track lasts 18days and the price for it is US\$55 which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

General study arrangement: In this track, you will receive six and half hours on learning technology, then five and half hours on applying technology each day.

The fast track is designed for the students who have limited time and are almost ready for the real exam. At the first week, your instructor will help to strengthen the specific weakness of your knowledge and review the most important parts of the exam topics with you. At the second week, you will be given at least four most up-to-date mock labs which will greatly prepare you for the real exam after step-by-step analyzing by your instructor.

Topics covered in the training:

Bridging and Switching; IGP Routing; EGP Routing; SP Multicast; ; L3/L2 VPN; SP QoS and Security; High Availability; Management.

2. Cathay's CCIE SP1-Stop Training - Fast Track (CSPAT-F) 23 days (186+ hours)

The SP one-stop training fast track lasts 23days and the price for it is US\$ 10255, which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

The fast track is designed for the students who have limited time and are almost ready for the real exam. At the first week, your instructor will help to strengthen the specific weakness of your knowledge and review the most important parts of the exam topics with you. At the second week, you will be given at least four most up-to-date mock labs which will greatly prepare you for the real exam after step-by-step analyzing by your instructor.

Pre-class requirements: Current CCSP Certification or 2 years experience with Cisco® equipment

General study arrangement: In this track, you will receive six and half hours on learning technology, then five and half hours on applying technology each day.

Topics covered in the training:

Bridging and Switching; IGP Routing; EGP Routing; SP Multicast; ; L3/L2 VPN; SP QoS and Security; High Availability; Management.

P.S.

How to save big money and earn knowledge?

You can save 10% if you fund your study 30 days ahead, 5% for two participants together and 10% for 3. While in group training, if your company would like to send four or more participants to our boot camps, please contact us for a substantial discount.

Our promise: We guarantee that if you failed to pass the relevant exam and get the certification after taking your boot camp, you can return to ours and retake the boot camp free of charge but pay the hotel's, meals and test voucher only. Furthermore, we believe this course offers the best possible training in this field. You can advice the instructor to withdraw from our courses and handle the relevant materials if you are not satisfied during the first 2 days of your study.
