

Check By Phone Software: Increase your sales dramatically!

Want to have the chance of closing imperative sales for your business and at the same time having your clients returning? Accepting check by phone opens the door for your prospective business set up – recurring customers, increasing market potentials, and impressive sales. With accepting check by phone and process the check with EZ Check Writer, launches the opportunities for your business you have been aspiring for.

Check by phone offers credit card convenience for customers with a checking account. Accepting check by phone is similar to accepting credit cards but it differs with the convenience, time, fees and the advantage for the customers and business. Accepting check over the phone is simple to handle. When your customer calls in to purchase and ask you how it will be paid, offers him or her to have his or her check by phone. No more distressing journey to the bank. You and your customers will be charged minimal banking fees unlike having credit cards for payment. No more charge backs! Just over the phone, you can have your customer's payment. Check by Phone creates stress-free handling and managing payment of the products or services offered by your business. Check by phone presents simple mechanism for the customers to buy and for the business to expedite the orders efficiently. After the customer purchased, offer him or her to have his or her over the phone. With the authorization given by your customer, you can now create a draft on your customer's bank account as a means of payment for your goods or services purchased over the phone.

Funds transfer is within 24 to 48 hours! There are 75 millions Americans who do not have a credit card. You can speed up your market potentials by turning those numerous people into your business clients. You can attract them by giving and informing them the benefits of accepting check by phone. Satisfy them in order to make them your business frequent customers. Accepting check by phone is as easy as paying by credit card and capable of immediate disbursement of goods and services purchased. Buying and selling process is also achievable through check by phone. It is also possible to provide faster shipping to check customers. Certainly, no more waiting paper checks to arrive and clear. Accepting check by phone offers quick account verification through knowing in real time whether funds are available. Less in-house paper works. When you have the authorization to create a draft on your customers checking or savings account, your problem now is to process the check. There is there certain software on the market that is highly recommended by its satisfied users – the EZ Check Writer Software! EZ Check Writer Software is favorably suggested because it offers unique features like Check Design Templates, MICR Font Line, Password Protected, Business Checks, Recurring Payments, and Payee Accounts.
