

Let your business have a rocket fly during Christmas Season.

Christmas --- you could imagine more

It comes but once a year. For this precious holiday, we don't want to lose anything! YouTube has now become the number one place on the internet to find interesting news clips and videos, and many of us upload our own videos for the world to see.

If you have a company that sells certain products, it's great to have your sales up during the Christmas Eve. Besides traditional ads, have you ever thought about advertising on YouTube? It would bring you tens of thousands of customers with the lowest cost!

For individuals, it must be very fun to share some of interesting things on YouTube. Or you can present your best regards to your friends or families just with a video put on YouTube during Christmas. Now, it is time to say hello to the world in this special holiday with YouTube. The problem is how we can make an attractive video presentation at the lowest cost since we know little about video edit and there is no professional software.

We can use PowerPoint to make the presentation for it has long been a favorite for creating great looking presentations in a easy way.

What it will be if you use both of them?

Are you ready to broadcast your product or just yourself to thousands upon thousands people? Before you do that, you must be clear about two things:

1. How to download a video from YouTube and embed it into your PowerPoint to make your presentation more attractive?
2. How to upload your PowerPoint to YouTube?

How to download a video from YouTube

It's very easy. There are many methods for you to choose from, and the easiest way is to use this website:

<http://all2convert.com/download-video-youtube.html> You can take any video formats as you want from YouTube. Then embed the YouTube video to your PowerPoint.

How to upload PowerPoint to YouTube

YouTube accepts only video files from most digital cameras, camcorders, and cell phones in the WMV, AVI, MOV, and MPEG file formats. And we all know that our PowerPoint presentations are not in video formats and Microsoft also doesn't support this conversion. So we need third party software to complete this process, and we don't want to lose any voice-over, movies, animations and transitions in the PowerPoint after the conversion. The converted video PowerPoint presentation should play as the original.

Our product Wondershare Video Presenter will make this task a piece of cake! Wondershare Video Presenter is an all-in-one PowerPoint to video converter. It can convert PowerPoint presentations to almost all popular video formats such as MPEG, AVI, MP4, WMV, ASF, FLV, MOV, 3GP, 3GP2. Ideal for trade show, digital signature, and in-store displays and ready for video podcast. Click here to learn more about it!
