There are two tracks for CCIE Security lab training, one is called Intensive Track (CSLT-I), which takes 14 days to have it done, the other is called Fast Track (CSLT-F) which probably takes 18 days.

Pre-class requirement for taking lab training:

You are Current holder of CISCO CCSP Certification or you have passed CCIE® written exam or that you have 2 years experience with Cisco® equipment.

(1) Intensive Track (CSLT-I) 14 days (112+ hours)

The intensive track proximately lasts 14days and the price for it is US\$ 6800, which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

General study arrangement: In this track, you will receive six and half hours on learning technology, then five and half hours on applying technology each day.

The intensive track is designed for the students who have limited time and are almost ready for the real exam. At the first week, your instructor will help to strengthen the specific weakness of your knowledge and review the most important parts of the exam topics with you. At the second week, you will be given at least four most up-to-date mock labs which will greatly prepare you for the real exam after step-by-step analyzing by your instructor.

CCIE Security LAB Training Table of Content:

Firewall, (A. PIX and ASA Firewall; B. IOS Firewall); VPN; Intrusion Prevention System (IPS); Identity Management; Advanced Security; Network Attacks

(2) Fast Track (CSLT-F) 18 days (148+ hours)

The fast track lasts 18days and the price for it is US\$7955 which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

General study arrangement: In this training track, you will gain six and half hours; training on learning technologies, then five and half hours on applying technologies each day during the first week. And in the second week, you will receive five and half hours; training on learning technologies, then six and five hours; on applying technologies each day.

The fast track is designed for the students who would like to obtain technical and to be well-prepared for the actual exam. Each student will receive a full customized study plan based on his specific weakness after being given a simulating test by his/her instructor. Besides, we provide more numbers of challenging and up-to-date mock labs than any competitor which will definitely become the key weapon for you to success.

CCIE Security LAB Table of Content:

Firewall, (A. PIX and ASA Firewall; B. IOS Firewall); VPN; Intrusion Prevention System (IPS); Identity Management; Advanced Security; Network Attacks
