

Outsourcing software products

Outsourcing, no doubt, has become the global trend. May it be software or other business processes. Profiteering apart, there are very few factors governing outsourcing. To take the competitive edge over rivals, multinationals go for outsourcing applications and [software development](#) to third world countries. India is taking a lead in outsourcing these products. India has remained a consistent and reliable outsourcing partner since years for many top notch software colossus.

Outsourcing India

These days about half of the Fortune 500 companies turn to Indian IT sectors to design, develop, modify and maintain their IT systems. India, the leading outsourcing partner for large number of multinationals has established goodwill in outsourcing business. Amongst a varied outsourcing projects software development genre has become notable. Microsoft, Dell, Oracle etc. have been outsourcing to India. Their corresponding Indian outsourcing partners are Infosys, Wipro, TCS etc. And they are delivering a satisfactory service towards the software needs of these vast multinationals. It is not only an option, but a profitable one considering the cost involved in the domestic product development. The sole reason behind outsourcing is the lower cost structure involved as regards manpower and infrastructure.

Small [business software development](#) is also not far from the scenario. Today many of the small business organizations are taking advantage of their software development outsourcing. Most particularly to gain the competitive advantage in a reduced cost, small business are taking into the outsourcing options to maximize their profit margins.

Next advantage of outsourcing is the accessibility to global experts. It is one of the best options for small business organization to have access to global talent in cost effective manner which can not be attained onshore with the same amount of investment.

May it be software outsourcing or business process outsourcing or knowledge process outsourcing, all these outsourcing, which could otherwise be done onshore, is done for the cost effectiveness point of view. Presently many of the IT firms are more concentrating into the software development than the other outsourcing varieties.

Indian IT firms are still dipped into outsourcing, but with the increasing rupee appreciation in India, an apprehension of ruination the future of IT outsourcing prevails over there. Till now IT outsourcing is doing a good business. How long it continues is the matter of concern.
