

## Price Comparison & Online Shopping Trivia

Internet shopping or online shopping is a procedure of buying some products, services or information over the internet, also known as e-commerce or electronic commerce transactional system. People can purchase any single or multiple items. Usually credit card is charged for all transactions. However other payment methods are also available depending upon the terms & conditions. Different shipping methods are also available. Some online retailer offers free shipping and some require extra payment. Whatever is the case, online shopping is turning into a most reliable, secured and fast medium of shopping.

Online shopping malls are gaining immense popularity. In USA, almost 37% people are now buying online products. In compliance of past shopping experiences, it was inevitable from all retailers and wholesalers to represent their online products with numerous discount deals. They offer different pricing options, shipping policies, free shipping codes and express delivery methods with all the conveniences of their customers. Many of them are providing price comparison shopping that definitely enables the user to buy wisely and at the best possible price. Visit [www.plaza101.com](http://www.plaza101.com).

In fact, it's quite amazing that people can buy their desired products just by sitting at their home computer and browsing all the bargains of off-line shopping. According to a consumer survey, retailers offering free shipping deals are in better position to get consumers attention. You can easily search a large number of sites offering these types of concessions.

Some online stores are moving one step ahead and providing a communal podium where people can buy as well as strengthen their social circle. Their social shopping mechanism is quite astonishing and exactly matches with end user requirements. Just assume that while making online transactions you are also making new friends and sharing your favorite products, wish lists & tags. This is the real magic of social networking. [www.plaza101.com](http://www.plaza101.com) is an ideal example for social shopping.
