

## Anti-Spyware with Spam Controls - advanced PC maintenance tool

Combine the power of Anti-Spyware with the industry's most sophisticated spam and phishing defence, Spam Controls. Defend your PC and your privacy against dangerous spyware, malware and phishing attacks now with one simple, integrated solution! Active Protection (Real-Time Blocking), Customizable scanning processes, Backup and Restore feature, Detects and quarantines spam from Outlook and Outlook Express.

Scrupulous detection and removal of adware, spyware, pop-up ads, keyloggers, trojans, hijackers, malware, and other potentially unwanted applications

One of the largest and continually growing definition databases of known and emerging threats in the industry protects Anti-Spyware users, detects near 300000 threats!

Cycle Detection, the first of its kind and exclusive to Anti-Spyware, prevents recurring loops where an alert message pops up repeatedly by detecting this loop and presenting these details so you can stop the loop in its tracks

Easy to set-up and use within minutes! No complicated rules to set-up and manage - Spam Controls does it all for you!

Free automatic spam database updates for the life of your subscription.

One of the highest detection rates in the industry, averaging a 97% detection rate!

Customer Care and Support that is second to none as we consider it a privilege to be of service to you and look forward to being a part of your PC security strategy as we ensure that you are never alone in your endeavour to secure yourself and your PC from spyware and spam.

Repair&Secure Software Union organization comment:

This is great anti-spyware tool and we are proud to distribute it. Extremely large database of available spyware. Perfect addition to XoftSpy SE, another outstanding anti-spyware tool.
