

## SharePoint 2007 Development Solutions

### What is SharePoint?

SharePoint is a family of products from Microsoft that enables organizations to have one stop solutions for collaboration, content management, business processes and portal development.

### SharePoint Family

The SharePoint family consists of:

1. Windows SharePoint Services (WSS): WSS is a free add-on to the windows server.
2. Microsoft Office SharePoint Services (MOSS): MOSS or SharePoint 2007 is a paid component of the Microsoft Office server suite.
3. Microsoft SharePoint Designer (SPD): SPD is a HTML editor aimed at editing SharePoint sites and end-user work flows for WSS sites.

### SharePoint 2007 (MOSS)
