

## Seven Convenient Principles of Good Practice in Education for Undergraduates

In last few decades, there has been a massive change in the undergraduate education. Focus on developing and strengthening ties with students has been encouraged in modern time to gain the maximum learning opportunities. In this article we'll talk about seven convenient principles of good practice in undergraduate education:

### **1. Facilitates Co-operation between Students and Faculty:**

Encouraging contact between students and faculty helps in improving motivation and involvement in order to develop a friendly environment for learning and knowledge. Faculty concern helps students get through rough times and keep on working.

### **2. Strengthening Reciprocity and Contact among Students:**

It is so true that learning gets easier and convenient when it is more like a team effort. Working in a team encourages confidence, learning capability and a cordial environment.

### **3. Leads to Active Learning:**

Learning is more of a dynamic process. It is not about sitting in a classroom, listening to the teacher, memorizing lessons and producing answers when asked. However, learning is an active activity, talking about an issue, participating in discussions, relate to the live experiences. They must make what they learn part of themselves.

### **4. Feedback is Required:**

For the fulfillment of every activity, prompt feedback is required. By way of feedbacks, students feel appreciated and the pace of learning gets faster and quicker.

### **5. Timeliness Assignments:**

Assignments are a kind of test of learning. It reflects the understanding and grasping power of a student in due course of learning period. Timeliness submission of tasks helps in learning effective time management.

### **6. Develops Communication:**

Communication is the best way to create a friendly and helpful environment which improves ties between students and faculty. By way of good communication, students can express their minds more freely and correctly and faculty can be able to understand their students in a better way.

### **7. Appreciates Talents and Recognize Ways of Learning**

Faculty must appreciate the pool of talent and their different ways of learning. Remember different person has a different grasping power and way to understand things. Try to aim at the ultimate learning then to look into different ways.
