

Wide variety of screensavers.

Screensavers. What do you imagine when somebody mention it? Is it a program which saves your display from being burned-in or a program which can make you PC look different? I'm definitely sure that you will answer that is a program for fun which contains a picture slide show of your favorite celeb, or 3D animated realistic theme, almost cartoon, and etc. There is a great variety of screensavers in the Internet, thus let me tell you a few words of the types of it.

Self-created screensavers. You had a birthday party, or you were best men of your best friend, or you have some pictures of your baby and would like to have these pictures behind your eyes, you can do that. There are some programs through the Internet which can create a slide show of you beloved pictures. Thus even at the office you can relax viewing your pet's pictures or watching the pictures of your winter holidays spent with the family.

Celebrity, cars, etc., screensavers. These screensavers also look like a slide show but with the better quality and with more features.

Animated screensavers. They can be 2D or 3D animated. The most realistic and the most beautiful screensavers are made in three dimension. It can be seasonal screensavers with Christmas or St. Patrick Day themes. You may get realistic nature screensavers to your desktop with waterfalls, butterflies, emerald green grass and squirrels, etc. All these themes would be accompanied by music and realistic sounds. Choose either the sounds of nature to enjoy the scene to the fullest or the original music track.

Today producers of screensavers give you an opportunity to model your 3D animated screensaver: you may choose scenes, set, for instance, the species and numbers of butterflies flying over the field, etc. Even the same screensaver may look different each time because you will alter it all the time.

Screensavers can be free. As a rule, all the demo versions of screensavers are free. There are also websites of totally free screensavers. Nowadays it is not popular to use adware or spyware in such a software. As for the paid screensavers, usually 3D animated screensavers cost \$9,99 or you may purchase a year subscription, or a CD with screensavers collection.

Not all the types of screensavers are described in the article as it is impossible to foresee what a screensaver would like to produce the author this time. That is why each time it is interesting to find out what new was discovered and created.
