

Top 4 Problems of Lottery Strategy Programs

The chances of winning the multi-million dollar Jackpot are very, very slim. Many companies produce and advertise software, guides, and systems that claim to teach people how to predict which numbers will play. If you are laughing hysterically right now please understand that some people actually believe in these things. These advertisements boast that their systems can teach people how to consistently win the Daily 3, the Daily 4, and the Daily 5 numbers as well as the Jackpot. I've seen these kinds of guides or software priced anywhere from twenty dollars to hundred of dollars.

So what's the deal with these lottery strategy programs? Are they just hype or can you follow their directions and hit the lottery? Read on for the truth you must know about lottery strategy programs.

The first problem is recent numbers controversy: Many state lottery systems have been accused of rigging the numbers that play. If the numbers are rigged, how can a program that you bought out of a magazine teach you how to predict which numbers will play and which will not?

The second problem of lottery strategy programs is their unpredictability: Honestly, would you want to base your weekly income on pure chance? The lottery is just a game to be played for entertainment purposes. You'd be lucky to occasionally win \$5, \$10 every now and then. Also, be aware of gambling addiction. Sometimes we don't know we have an addiction to gambling until it is too late. Take it from me: I've had my fair share of gambling problems in the past. It is not pleasant – trust me. Play the lottery; don't let the lottery play you.

The third problem is winning the lottery is nearly impossible! Buying a lottery strategy system will not enhance your chances anymore than random number play. The Lotto Industry is a business that plays on primal human emotions and near impossible odds. As mentioned above, the chances of you ever winning a million dollars from the lottery are virtually zero. The chances of you getting struck by lightning three times, standing in the exact same spot each time are greater than you winning a million dollars with this thing.

The fourth problem is these programs are insulting to your intelligence: Not much more can be said about these programs. Do not waste your time, money, or mental energy buying one of these stupid things! They flat out do not work.

Conclusion

There have been thousands of people who have fallen victim of lottery strategy scams. People who simply want to earn an extra income from the comfort of their homes find themselves cheated by con artists who take advantage of their hopeful attitudes. There are legitimate companies out there offering real work at home opportunities for those interested. Unfortunately, home based business scams are at an all time high. It has become harder to find legitimate work from home operations. Don't waste your time investing in these silly scams.
