

Play Online Pool Games

A new site offering online pool and snooker plus exciting tournaments.

Billiard Magic is a brand new site dedicated to online billiard games. Catering for anyone who enjoys a game of pool or snooker, this site has everything you need to know about playing online.

Offering a variety of billiard games, backed up by top of the range software and graphics, Billiard Magic welcomes both experienced players wishing to perfect their technique and newcomers who would like to learn a new game.

Not only can you play fun billiard games at Billiard Magic, but there are lots of exciting opportunities to enter tournaments and win cash prizes.

Regular promotions means it's never dull at BilliardMagic.

Playing online can be a lot of fun, especially when you start to meet the other players. Hundreds of pool and snooker fans from around the globe may be logged on at any one time, giving you access to an amazing choice of opponents. By watching others play, you can learn new techniques and strategies and generally improve your game.

Choose from 8 ball pool, 9 ball pool or snooker. Online pool is played just like real live pool, except players use the mouse to line up the cue and hit the ball. By varying the speed of the mouse, the shot can be varied in strength - as in reality. Accurate technology means that shots work on angles the same way as in live pool, and players must calculate the correct angle for their shot.

Helpful software gives tips for beginners on how to figure out your angle, making this complicated process a little easier for the technically challenged. If you're serious about improving, you could even watch the pros playing in tournaments to see how they do it.

Players have the choice of playing for fun or for money at Billiard Magic. To play for money, there is a simple deposit process by which players add money to their account. Any winnings can then either be used for further play, or can be withdrawn, according to the terms and conditions.

All games can be played either against the computer, or against other real players. Or better still, get your friends to sign up, and play against each other. Get a head start by practising online before you invite them to a match.

In online pool the same rules apply as in traditional pool, so if you make a foul, the turn passes to your opponent. Foul shots include not hitting any ball on your shot and pocketing the white cue ball. Other shots can cause the player to lose immediately, such as pocketing the black by mistake.

Tournaments are held regularly at Billiard Magic, with sit and go, or freerolls available. Win a tournament and as well as the cash prize, you'll go into the hall of fame.

Playing pool and snooker online is fun and challenging and the more you play, the more skilled you will become. The thrill of winning real money by playing online pool is a huge adrenalin rush. Start playing today and discover the winner in you!
