

A Cool Software to Split and Merge your PDF Documents

PDF Splitter & Merger is a handy and user-friendly PDF tool making splitting and merging PDFs a breeze! The split function lets you split PDF files based on page ranges and page numbers. Merge PDF documents quickly by sorting and combining a group of files using the merging feature.

Working with PDF files

PDF (Portable Document Format) documents can range from a simple single-page file to more complex documents such as brochures, data sheets, white papers and technical manuals, some containing thousands of pages, making them very difficult to handle. Accessing the information you need to read, print, publish and share can become a challenge and very time-consuming. Having a PDF utility to ease and streamline your workflow is essential.

Reorganize your PDF files and make them more manageable

PDF Splitter & Merger is a PDF tool developed for quicker and more efficient access to information needed from your PDF files, reorganizing them in a way that makes them easier to manage and handle. With the ability to split PDF files into separate documents, either by page range or page numbers, and merge an unlimited number of PDF documents into a single PDF file, our solution helps you gain control of all your PDF files.

Advantages of using PDF Splitter & Merger:

- * Reduce workflow - don't waste any more time trying to handle large PDF documents.
- * Manage PDF files with ease - reduce the size of PDF documents by splitting them into smaller, more manageable files. Organize files by merging the documents you need.
- * Intuitive interface - an easy UI enables you to quickly learn how to split and merge.
- * Merge PDF documents through an easy 3-step process - add files > name new file > hit merge button.
- * Offers several methods to split PDF files .
